Update on the Supply of Products Due to the Middle East Situation

Dear Valued Customers,

We would like to express our sincere appreciation for your continued support.

As the situation in the Middle East remains tense, there is an increasing possibility that the supply of raw materials across the market may become constrained.

Under these circumstances, we are closely monitoring procurement conditions and supply-demand trends, and we are taking appropriate measures to ensure a stable and sustainable supply of our products.

For each individual order, we will propose appropriate supply adjustments including pricing, taking into account the supply-demand balance, current supply conditions, and order quantities.

Please be assured that we will continue to make every effort to maintain a stable and reliable supply to our customers to the greatest extent possible, while responding appropriately to changes in the operating environment.

We greatly appreciate your continued support of YUPO products.

Katsuhiro Naito
President
YUPO Corporation
